MEZCAL

You know all about tequila and now you want to open your horizons to another magnificent Mexican spirit. Mezcal is very similar to Tequila. It's produced in Mexico from the agave plant, just like Tequila. The difference is in the way it's produced and the resulting flavor and aroma of the liquor. Mezcal is not just distilled. The agave plant is harvested, then roasted in underground pits to impart the famous smoky flavor and aroma. It is then twice distilled to ensure quality.
